Q.1 What according to you is the most interesting technical aspect of the white paper ?

A.1 Data Identity and Data Profile which creates an encrypted identity for a user to safely share data points with systems online without any possible data breach, helps you maintain privacy and anonymity while interacting with various online channels and also helps you share particulars of your data map without giving away sensitive information like your name, email address or phone number.

**Q.2 What particular aspect of the technology according to you is the least viable ?
(in terms of technical efficiency)**

A.2 I don't have enough knowledge regarding this so I can't say.

Q.3 What is the thing you would like to change in the technical architecture or this project ?

A.3 I don't have enough knowledge regarding this so I can't say.
